#### **Non-GAAP Financial Measure**

Intellinetics uses non-GAAP Adjusted EBITDA as a supplemental measure of our performance that is not required by, or presented in accordance with, accounting principles generally accepted in the United States (GAAP).

A non-GAAP financial measure is a numerical measure of a company's financial performance that excludes or includes amounts so as to be different from the most directly comparable measure calculated and presented in accordance with GAAP in the statement of income, balance sheet or statement of cash flows of a company.

Adjusted EBITDA: Adjusted EBITDA is not a measurement of financial performance under GAAP and should not be considered as an alternative to net income, operating income, or any other performance measure derived in accordance with GAAP, or as an alternative to cash flow from operating activities or a measure of our liquidity. Intellinetics urges investors to review the reconciliation of non-GAAP Adjusted EBITDA to the comparable GAAP Net Loss, which is included in this press release, and not to rely on any single financial measure to evaluate Intellinetics' financial performance.

We believe that Adjusted EBITDA is a useful performance measure and is used by us to facilitate a comparison of our operating performance on a consistent basis from period-to-period and to provide for a more complete understanding of factors and trends affecting our business than measures under GAAP can provide alone. We define "Adjusted EBITDA" as earnings before interest expense, any income taxes, depreciation and amortization expense, stock-based compensation, note conversion and note or equity offer warrant or stock expense, gain or loss on debt extinguishment, change in fair value of contingent consideration, and transaction costs.

### Appendix

Recurring Revenue: Recognized revenue for any applicable period that we characterize as being recurring in nature, without regard to contract start or end dates or renewal rates. It includes the following revenue types: SaaS subscription agreements, maintenance contracts related to perpetual software licenses, storage and retrieval services, and professional services revenues in the nature of business process outsourcing. It excludes revenues of a type that are not expected to recur, primarily perpetual licenses, most document conversion services, and other professional services that are project based. Recurring revenue is not determined by reference to deferred revenue, unbilled revenue, or any other GAAP financial measure over any period, so the Company has not reconciled the Recurring Revenues to any GAAP measure. Recurring revenue should not be extrapolated into a precise prediction of future revenues, because it does not take into account our contract start and end dates and our renewal rates. Management believes that reviewing this metric, in addition to GAAP results, helps investors and financial analysts understand the value of Intellinetics' recurring revenue streams versus prior periods.

Note 1 – Software as a service non-recurring revenue is comprised of professional services setup fees which are recognized ratably over the initial contract period. They do not renew, and are therefore non-recurring. Under ASC 606, they are deemed essential to the functionality of the subscription Software as a service, and are therefore recognized together with the subscription Software as a service revenue.
